

Press Release GradConn Interconnect – 1st September 2007.

3.96mm (0.156") and 5.08mm (0.2") pitch board to board connectors

3.96mm (0.156")

5.08mm (0.2")

GradConn are pleased to introduce two new ranges of board to board power connectors suitable for 7.9amp current rating.

Connectors are available single in line in 3.96mm 2-24 contacts and 5.08mm 2-20 contacts.

Pin headers are available thru-hole in straight and right angle orientations. Straight female sockets in both through hole and surface mount.

Sockets have a reliable dual contact design, the SMT socket is suitable for dual entry (from either top or bottom) to allow various mating solutions.

The range is fully ROHS compliant and insulators are LCP (liquid crystal polymer) capable of withstanding high temperature (280°C for 10 seconds) during reflow solder process.

Various packaging options are available including tape and reel (for SMT) versions, including an option of a added plastic cap to aid the vacuum pick and place process.

Drawings and Full product specifications are available on the GradConn website:

www.gradconn.com

About GradConn:

GradConn is a leading connector manufacturer specialising in Board to Board and SIM card connectors.

With our head office in Taiwan and manufacturing facilities in China, we offer high quality components at an economical cost.

Gradconn produces RoHS compliant, quality board to board connectors in 0.5mm, 0.8mm, 1.00mm, 1.27mm, 2.00mm, 1.27mm x 2.54mm, 2.54mm, 3.96mm and 5.08mm pitches.

Our manufacturing facilities in China are covered by ISO9001 giving assurance that our quality control systems are stringent and that we are able to produce consistently high quality components every time.

All Gradconn parts are fully RoHS compliant, we offer parts in high temperature plastic to allow components to withstand high temperature reflow solder process. Full details can be found on the specific product drawings at: www.gradconn.com

A modular production system allows choice of plating options, custom pin lengths and insulator heights on many connector ranges. We can also offer a variety of packaging choices to suit customer's requirements.

Gradconn offer a design advice service, short lead time and free sample service to bring customer's designs to market fast.

Gradconn are happy to help customers cross refer existing connector brands, simply send the details to Gradconn or our distribution partner and we will complete the cross reference work, including detailed breakdown of any differences, which can save your engineering team time and effort.

Gradconn also provide a wide variety of custom products, such as: Kinked pins, blanked holes on sockets, missing pins, headers bent to unusual angles, different size SMT leads and non-standard pitch products.

Whatever your board to board requirement, choose Gradconn.
